SUMMARY

Junior Full-Stack Developer experienced in building scalable web applications, resolving complex technical issues, and delivering customer-focused solutions. Proficient in Laravel, React, Vue.js, PHP, Python, and MySQL.

PROFESSIONAL EXPERIENCE

Junior Developer

RevDojo

01/2026 – 05/2026
Florida, United States

- Resolved 10+ application tickets daily using Laravel, Vue.js, MySQL, Git, and REST APIs.
- Maintained and enhanced LMS functionality used by automotive industry clients.
- Investigated, reproduced, and resolved user-reported defects to improve platform stability.
- Collaborated with developers through Git-based workflows to deploy bug fixes and feature enhancements.
- Assisted with API troubleshooting and database issue resolution.
- Performed QA testing to identify issues prior to production deployment.

Technical Support Representative

Strikingly

08/2022 – 01/2026
California, United States

- Delivered technical support via live chat and email, resolving 80+ customer inquiries daily across website building, domains, hosting, and account management.
- Maintained a 96%+ customer satisfaction rating while supporting a global customer base and consistently meeting service quality standards.
- Diagnosed and resolved DNS, SSL certificate, domain configuration, website design, publishing, and SEO-related issues, minimizing customer downtime and improving website performance.
- Investigated complex technical issues, identified root causes, and guided customers through effective troubleshooting and resolution processes.
- Collaborated with engineering teams by documenting, reproducing, and escalating platform defects, contributing to faster issue resolution and product improvements.
- Created and maintained troubleshooting documentation that improved operational consistency, knowledge sharing, and support efficiency.

Freelance programmer

UvoCorp

02/2024 – 09/2024
Ukraine

- Delivered 12+ client software projects involving PHP, Python, C, and C++, consistently meeting project deadlines.
- Developed custom software solutions based on client specifications across multiple industries and technology stacks.
- Engineered a Linux-style file system simulator in C utilizing dynamic memory allocation and data structures.
- Built an academic record management application using object-oriented programming principles in C++.
- Produced maintainable and well-documented code, improving long-term project scalability and usability.

PROJECTS

ErgoVision (2025)

AI-Powered Posture Detection System: (<https://github.com/DarivsXP/Ergovision>)

Technologies: Python, Laravel, Vue.js, MediaPipe, Sanctum, Random Forest, MySQL, RESTful APIs

- Developed an AI-powered web application capable of detecting posture in real time.
- Integrated machine learning models to analyze posture and provide ergonomic recommendations.
- Built a responsive dashboard using Laravel and Vue.js for user interaction and monitoring.
- Implemented API communication between machine learning services and the web platform.

VertexShop (2026)

Full-Stack E-Commerce Platform (www.github.com/DarivsXP/VertexShop)

Technologies: Laravel, React.js, MySQL, RESTful APIs, Tailwind CSS, Sanctum, Git

- Engineered a full-stack e-commerce platform featuring secure authentication, product management, shopping cart, and order processing capabilities.
- Developed a responsive customer-facing storefront and administrative dashboard using Vue.js and Tailwind CSS.
- Designed and integrated RESTful APIs to facilitate seamless communication between frontend and backend services.
- Implemented inventory management and order tracking systems to streamline business operations.
- Applied Git-based version control and scalable development practices throughout the project lifecycle.

Nathalie's Bakeshop (2026)

Client E-Commerce & Business Management Platform: (www.github.com/DarivsXP/nathaliesbakeshop)

Technologies: Laravel, React.js, MySQL, RESTful APIs, Git

- Developed a production-ready web platform for a bakery business, supporting product management and customer-facing operations.
- Collaborated directly with stakeholders to gather requirements, implement feedback, and deliver business-critical functionality.
- Maintained and enhanced application features through iterative development and bug resolution.
- Utilized Git-based workflows to manage releases and ongoing improvements.

Your Offshore Accountant (2024)

Business Website Development

Technologies: HTML5, Bootstrap 5, JavaScript

- Collaborated with a client to design and develop a professional accounting services website.
- Built responsive user interfaces optimized for desktop and mobile experiences.
- Implemented modern Bootstrap-based layouts focused on usability and lead generation.
- Delivered the project according to stakeholder requirements and business objectives.

TECHNICAL SKILLS

Programming Languages

- PHP, Python, JavaScript, TypeScript, C, C++

Tools & Platforms

- Git, GitHub, Vite, Postman, npm, Composer, Docker, Firebase

Concepts

- MVC, OOP, CRUD Operations, API Integration, Authentication & Authorization, CI/CD

Frameworks

- Laravel, Node.js, Vue.js, React, Bootstrap, Tailwind CSS

Databases & APIs

- MySQL, PostgreSQL, RESTful APIs, JSON, WebSockets

EDUCATION

Bachelor of Science in Computer Science

First Asia Institute of Technology and Humanities

09/2022 – 05/2026

Tanauan City,
Batangas
